Professional Experience

HyperCube Ltd.

Machine Learning Engineer

April 2020 - Present

Self employed

Software Engineer

April 2020 - Present

Projects

Diagnosis of eczema skin disease using computer vision, HyperCube Ltd.

Jan 2021 - present

```
 Image denoising by means of deconvolution and using low pass filter in Fourier domain.
 Examining SIFT features and establishing matches between images of skin disease.
```

Python openCV

NLP based Chatbot, HyperCube Ltd.

June 2021 - Dec 2021

```
 Model deployment, system design and maintenance using AWS Amplify, AWS Api Gateway, AWS
Lambda, AWS Sagemaker.
 Front and backend development using Flutter/Dart/Swift programming languages.
```

AWS Dart/flutter Swift Docker Git

Database design and deployment, HyperCube Ltd.

March 2021 – May 2021

```
 Designed MySQL database schema and deployed it in Azure.
 Using web application API to connect web app with the database.
```

MySQL Azure Python Git

Supply Chain Optimization, HyperCube Ltd.

December 2020 - February 2021

```
  Research on optimization problems.
  Using linear programming and integer programming methodologies in Gurobi Python and C++ for
supply chain optimization.
```

`Python` `C++` `Git`

Video Anomaly Detection, HyperCube Ltd.

May 2020 - November 2020

```
  Research on deep learning based activity detection algorithms.
  Constructing and deploying algorithm to detect anomalous events in video.
  Transferring the analysis data to Azure DB deployed in cloud.
```

`Python` `OpenCV` `PyTorch` `MySQL` `Azure` `Docker` `Git`

Memorize: An iOS game for training memory, Self employed

June 2021 - Present

```
  Designing front end and game logic in Swift programming language.
```

`Swift` `Git`

amusta-chain: A decentralised peer to peer blockchain, Self employed

June 2021 - Present

```
  Enabled proof of work based dynamic mining mechanism among the peers
  Currently working on creating a GUI based cryptocurrency wallet application
```

`Javascript` `Git`

Academic Qualifications

Tohoku University Sendai, Japan
MSc. Elementary Particle Physics [2018 - 2020]

Tohoku University Sendai, Japan
BSc. Physics [2014 - 2018]

Tokyo University of Foreign Studies Tokyo, Japan
Associate Degree, Japanese Language [2013 - 2014]

Research/Talks

Masters Thesis：Machine Learning, Deep Learning, Data Analysis

```
  Simulation of particle collisions and their reaction in particle detectors using C++.
  Desiging particle detectors using C++ framework.
  Analyzing data read by particle detectors using machine learning and deep learning
algorithms.
```

Python OpenCV PyTorch C++ Git CMake

Conference Presentation: Japan Physical Society Annual Meeting

```
  Full Detector Simulation of Pair Monitor and Application of Machine Learning to Determine
Determine Beam Size
  Nagoya University, Nagoya, Japan [March '20]
```

Conference Presentation：International Workshop on Future Linear Colliders

```
  Search for weakly interacting dark matter in the International Linear Collider
University of Texas, Arlington, Texas, USA. [Oct '18]
```

Language Skills

```
  English, Business Level, TOEFL iBT 110
  Japanese: Business Level
  Bengali: Native Level
```

MOOCs

- Deep Learning Specialization : Coursera, Stanford Online
- Algorithm Specialization : Coursera, Stanford Online
- GAN Specialization : Coursera, Stanford Online
- NLP Specialization : Coursera, Stanford Online

Categories: Python C++ Algorithms Deep Learning
